FOREWORD

Time is that fleeting element in every student's life that seems to take on endless shapes, and forms. There are happy times and bad times, along with never having enough time—enough time to fully live each moment of a high school year. Surely we have all done our best, and in THE '70 PAGE we hope that every aspect of the **special** times will be fondly remembered.

*"... By the peaks
of the Blue
Ridges, standing,
evermore ..."*

Staff

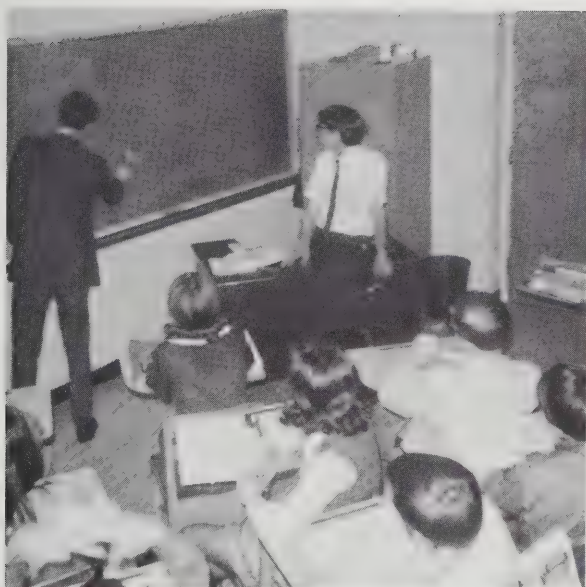

Our custodians, Paul Louderback and Owen Jenkins, keep our building clean.

Mr. Lois Huffman works hard keeping the office straight.

These are the smiling faces behind our "scrumptious" meals. The cafeteria workers are Mrs. Mamie Comer, Mrs. Alice Shuler, Mrs. Elva Price, and Mrs. Grace Pence.

CURRICULUM

Language

Language is a systemized group of sounds used for communication. In the halls of P.C.H.S., three languages are heard—French, Spanish, and English.

Sherry Comer and Mrs. Pettit examine a bulletin board based on the novel, *In Cold Blood*, which the sophomore class read.

French sounds are heard in the language lab for the first time this year at Page.

All Spanish students are encouraged to join the Spanish Club. The club enforces the principles learned in class. Students in Spanish costumes seem to enjoy a fiesta.

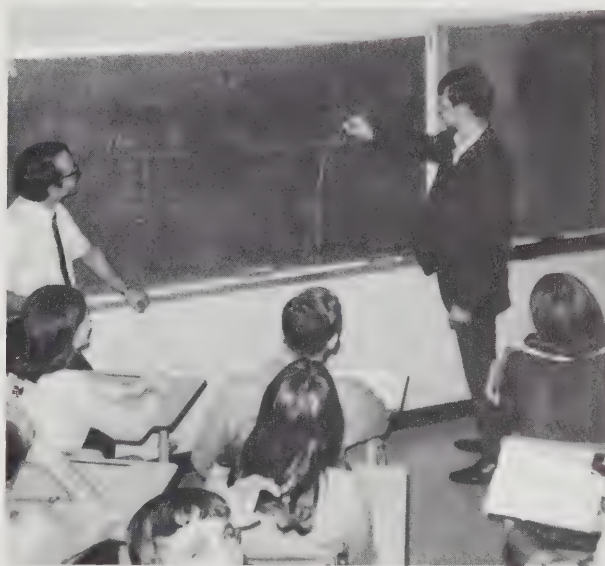

Eighth graders work with the practical aspects of language. Pam Turner, Mona Jenkins, and Judy Comer seem to be struggling over letter accuracy.

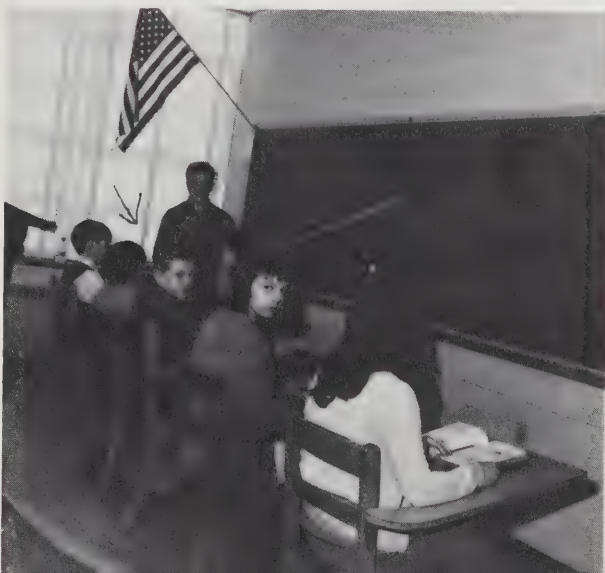

Math

The mathematics department offers two years of general mathematics, three years of algebra, consumers' mathematics, geometry, and trigonometry.

Larry Burke and Larry Cave put their heads together over a graphic problem in Algebra I class.

Ronnie Keyser tries to teach his fellow students the principles of Math 8.

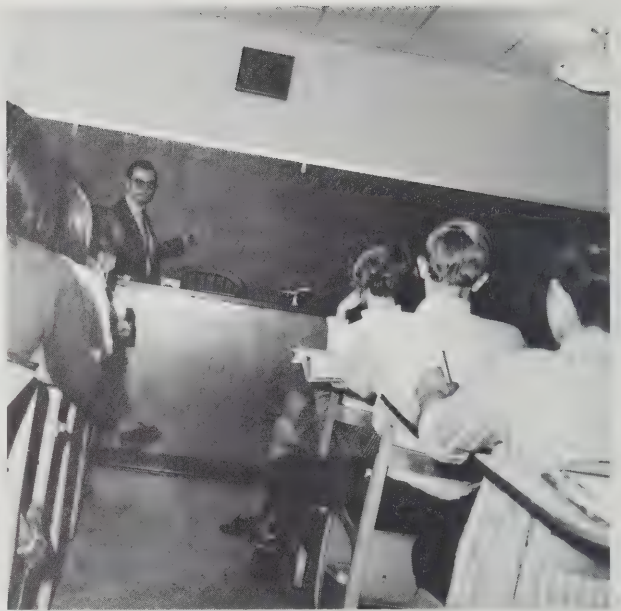

Science

The Science Department offers five major courses — including general science, earth science, biology, chemistry, and physics.

Mr. Horne lectures as his general science class listens attentively.

A group from the physics class seem to be deeply engrossed in an experiment showing the specific heat of various metals.

Mr. Stern points out the molecular formula for Nitrogen Oxide.

The department tries to encourage curiosity that leads to investigation, insight, and discovery of the fundamental concepts of science.

Mr. Fankhouser points out various prehistoric mammals to Roger Grimsley and Shirley Fox from a chalk-colored mural made by the students.

Social Studies

The Social Studies department offers world geography, U. S. government, U. S. history, social studies and economics.

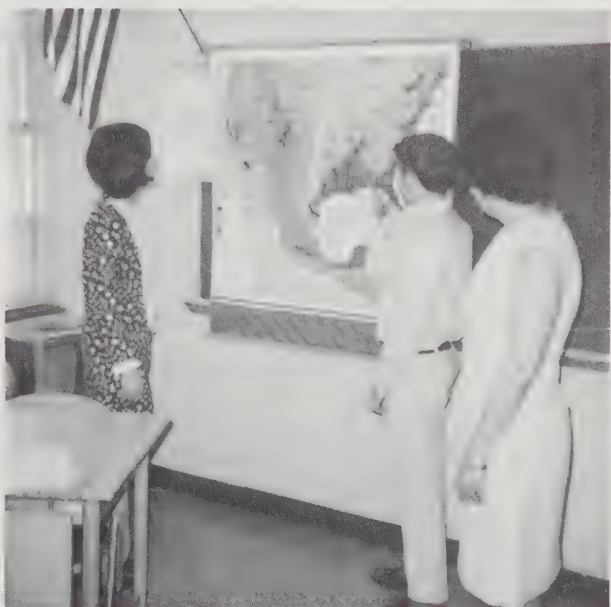

Mr. Hott's U. S. history class takes time to polish up on how to honor the flag.

History students keep themselves up on the news through the use of **Senior Scholastics**.

Mrs. Alger's government class concentrates on the 1969 political maneuverings.

The department promotes a better understanding of the social, political, economical changes in everyday living.

Mrs. Wayland watches as Pan Turner and Randy Clary point out the Mississippi in Social Studies 8.

Ronda Boggs, Dottie Batman, Barbara Sampson, Janice Seal, and Kathy Hilliard hold an award well-deserved by the Future Business Leaders of America, which consists of students from the business classes.

Business

The Business Department offers vocational preparation to the students for business jobs and careers. The business offerings include general business, typing I and II, shorthand I and II, office practice, office machines, and bookkeeping.

Mrs. Southerly typing class races in accurate time-typing to beat the clock.

Students in a shorthand class practice writing an assignment.

Janet Weakley, Sharon Kandill, Debbie Saylor, and Diana Kite, who are all business students, examine a prize winning display from F.B.L.A.

Art

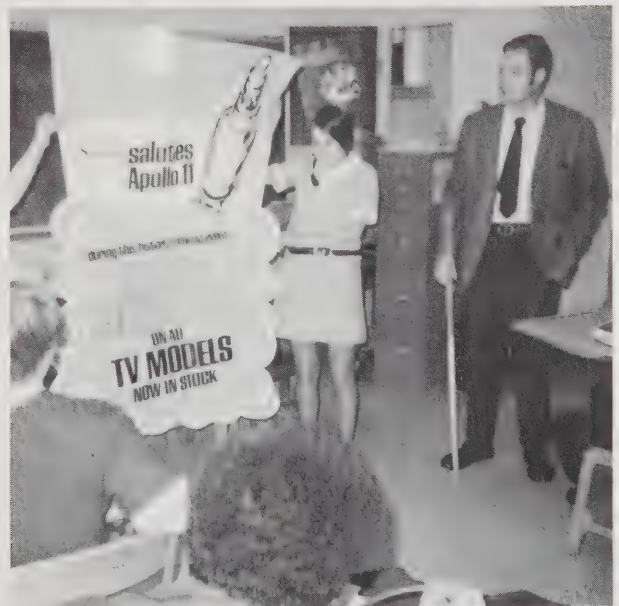

The Art Department offers two consecutive years of art and an arts and crafts class.

Some Art I students paint a nativity scene on the office windows.

Distributive Education

In its second year, the Distributive Education Department consists of three courses — one is a preparatory course and the other two are work-study programs. The main purpose of the department is to prepare the student for an entry job in the field of distribution.

Mr. Carson and students work diligently on the effectiveness of advertising.

Wendell Beahm, Roy Harlow, and Richard Maye put a bulletin together for agriculture.

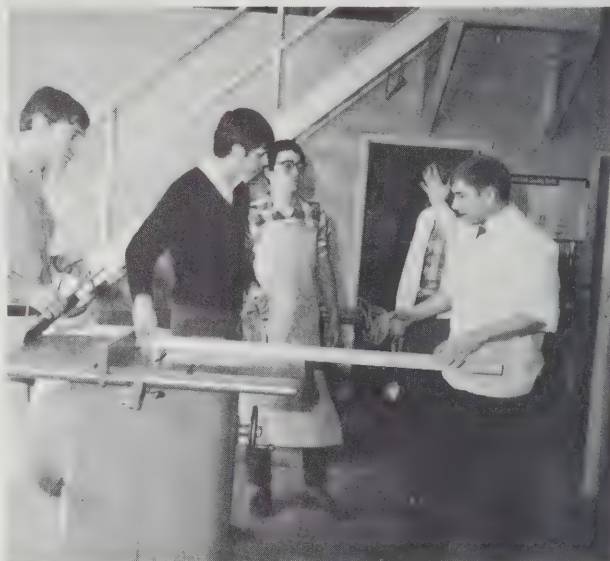

Agriculture

Agriculture affords a great future for young people—not only in farming and farm management — but also in business, industry, education, research, conservation, and recreation. Amazing advances in scientific agricultural occupations make this a great challenge to the youth of today.

Building Trades

Building Trades was offered at P.C.H.S. for the first time this year.

Eddie Shenk, Bruce Wright, and Teddy Stoneberger listen attentively as Mr. Shirkey lectures.

Industrial Arts

Students enrolled in classes in the industrial arts department take courses that range from woodworking and metal working to mechanical drawing.

Home Economics

Debbie Purdham and Rosalie Snow struggle over the stove to prove that Home Economics I students can do.

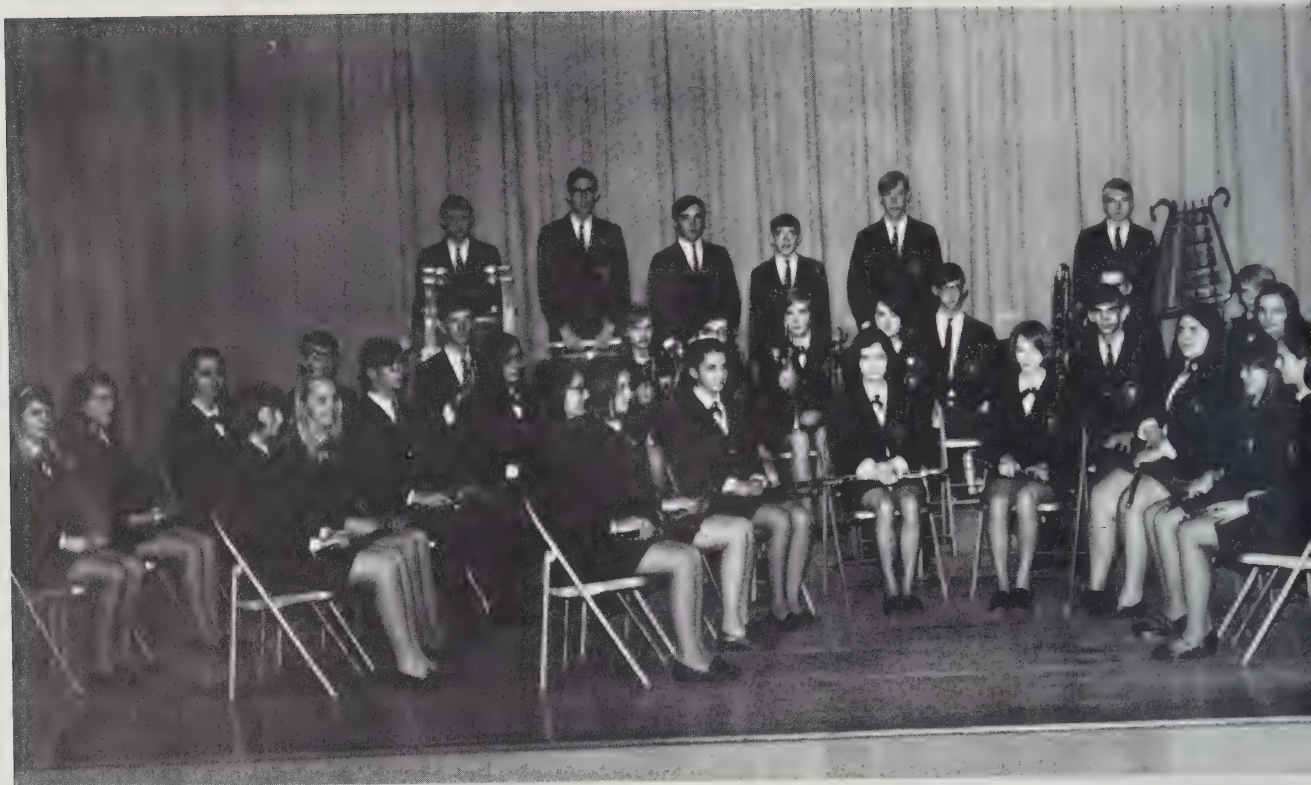

Beverly Hansbrough, Frances Hilliard, Margie Lucas, and Pattie Stanley make roses in Home Economics 8 for F.H.A. Week.

The Homemaking Program is designed to help prepare students for their future roles as homemakers in an everchanging society, and to better equip them for their present roles as consumers, family members, and individuals.

Mrs. Carson presents Carla Pettit with a pin and certificate for winning the Betty Crocker Home-making Award.
